

The Great Britain Outrigger Return to Outrigger Teamsport plan, based on the risk assessment below, is led by Government advice to Sport and Recreation. The return to teamsport in crew-boats (OC2, V3, OC4, V6/OC6 and V12) guidance should be viewed alongside Great Britain Outrigger's ongoing COVID-19 guidance and the [government's guidance to sport and recreation](#).

Activity	Possible Proximity Interactions	Restrictions	Likelihood	COVID Risk Level	Mitigations
Single person outrigger (OC1, V1) (and crew boats made up of single households)					
Launching the boat	Others launching boats	Only same household able to help launch boats	Low	Low	Limited access to boathouse Consider use of face coverings
On the water	Other crews on the water in different boats	None	Low	Low	Boats instructed to maintain distance
Mixed household crews (OC2, V3, V6 and V12)					
Launching the boat	Other boats	2m distance must be maintained when launching	Low	Low	Limited access to boathouse Consider use of face coverings
	Other crew members	2m distance must be maintained when launching	Medium	Low	Records of all crews maintained for test and trace for 21 days
On the water	Other crews on the water	None	Low	Low	Boats instructed to maintain distance
	Crew members (>1m)	Timing between crew members adhered to	High	Medium	Records of all crews maintained for test and trace for 21 days Reduced by using smaller boats Consistent crews to reduce mixing
	Crew members (0-1m, slipstream, non-fleeting) e.g. out of sync outrigging	Water conditions should be such that crew members can maintain consistent timing and body movement	Medium	Increased	Records of all crews maintained for test and trace for 21 days Reduced by using smaller boats Consistent crews to reduce mixing Consider use of face coverings if weather/ water conditions allow Leave seat 5 empty if weather/ water conditions allow
Coach Boats and Safety Launches (2 – 3 persons on board)					
Normal operation –	Dependent on size of RIB may	Utilise same household crews OR Single Person OR Face	Medium	Increased	Utilise same household crews

driving at speed	be <1m	covering			Single person operating Face covering where >1m cannot be maintained
Mark Laying	>1m	None	Low	Low	None
Rescue of person in water	<1m	Experienced crew with members well practiced in rescue procedures	Medium	Medium	Wear face covering. Ensure casualty is facing away from the safety boat. If able casualty to self-rescue using strap or ladder If casualty conscious and able they should wear face coverings once aboard safety boat
